Campus Cleaning: (Aug. to Dec. 22)

Awareness regarding the “Swachata” is created among our students by regular routine activity of campus cleaning. In each week, students of every branch spend their two classes for campus cleaning and give the message of “Swachhata” to the community. According to the class routine 60 to 120 students took part for campus cleaning regularly from the month of Aug, 2022 to December 2022, the utensils and requirements for cleaning purpose were supplied by NSS team and college authority. It develops a habit of hygiene among students.
World Food Day: (16.10.22)

World Food Day is an annual event celebrated on October 16th. Each year, World Food Day has a specific theme related to food security and nutrition. This theme often reflects current challenges and issues in the global food system. Various events, campaigns, and initiatives are organized on this day at local, national, and international levels to address these themes and work toward the goal of ending hunger and ensuring food for all.

In this day students and teachers organized food party and food show in afternoon session. 504 students are involved in different group to make this event success.
"Universal human values" are ideas and standards that are regarded as essential and prevalent in all communities and civilizations. These ideals are thought to be universal across cultural, religious, and geographic divides and to be ingrained in human nature. A number of values are frequently mentioned as having broad applicability to humanity, even though the precise values that are deemed universal may differ based on the cultural or philosophical viewpoint.

In this program 1500 students are involved, with great involvement of 100 teachers and dignitaries from different fields.

It's crucial to remember that different cultures and belief systems may have different interpretations of and emphasis on these principles. Even though these principles are frequently seen as universal norms, there may be differences in how they are applied and prioritized depending on historical, cultural, and personal circumstances.

One day Symposium on Future Research and Education: (03.11.22)

The trajectory of research and education is anticipated to be influenced by a multitude of rising trends and developments. The following are few significant domains and motifs that have the potential to shape the trajectory of research and education in the future:

Dr. Rajib Kumar Dube and Prof.(Dr.) Deepak Kumar Jana covey their valuable speech and opinion on this topic. In this program 300 students are present among which 200 are male and 100 are female.

It is anticipated that the future of research and education will exhibit a dynamic nature, characterized by technological developments, developing societal demands, and an increasing focus on collaboration and sustainability. The ability to effectively adapt to these changes and effectively manage the issues that arise will play a pivotal role in fostering a research and education landscape that is more inclusive, inventive, and impactful.
Vigilance awareness pertains to the condition of being attentive and vigilant in order to proactively identify and avoid instances of corruption, unethical conduct, or illicit activities. Promoting openness, integrity, and ethical conduct is a significant focus inside government agencies and institutions. In India, the Vigilance Awareness Week is annually observed from October 27 to November 2 with the aim of fostering consciousness regarding corruption and the significance of upholding integrity.

In two days we perform two Essay writing competition on Vigilance awareness. 123 students take part in this event.

Dengue Bijoy Abhiyan (24.06.23)

Dengue is an infectious disease caused by a virus, which is primarily transferred to humans by the bite of female Aedes mosquitoes, with the Aedes aegypti mosquito being the main vector. The issue at hand is of considerable importance in numerous global locations, with a particular focus on places characterized by tropical and subtropical climates.

Dignitaries from Haldia Pourasava and 420 students take part in this social welfare activities. Dengue fever is the result of an infection caused by the dengue virus, a member of the Flaviviridae family. The virus is classified into four distinct serotypes, namely DEN-1, DEN-2, DEN-3, and DEN-4. It is important to note that infection with a particular serotype does not provide immunity against the remaining serotypes.
